# Profile of GMAT ${ }^{\circledR}$ Testing: North American Report <br> Five-Year Summary: TY2011-TY2015 

November 2015

Globally, nearly 1.3 million Graduate Management Admission Test ${ }^{\oplus}$ (GMAT® ${ }^{\oplus}$ ) exams have been taken over the past five years by individuals interested in pursuing graduate management education. The GMAT exam is an important part of the admissions process for more than 6,100 graduate management programs worldwide. A total of 247,432 GMAT exams were taken worldwide by prospective business school students in testing year 2015 (TY2015), which ran from July 1, 2014 through June 30, 2015. These examinees sent a total of 600,415 score reports to graduate-level management programs across the globe.

This report summarizes five-year GMAT testing trends for US and Canadian residents and includes:

- GMAT exams taken by US region, US state of residence, and race/ethnicity of examinees (US citizens only);
- GMAT exams taken by Canadian residents, by Canadian province;
- GMAT exams taken by gender and mean age of GMAT examinees;
- Mean GMAT Total score; and
- GMAT score-sending breakdowns by program type for TY2015.

Mean GMAT Total scores and mean age of examinees are provided for groups with five of more exams taken and 10 or more score reports sent.

## What Can I Do With the Data?

Use the data to build candidate profiles for specific US or Canadian groups. For example, you can use the tables to determine the following about Texas residents who sat for the GMAT exam in TY2015:

- Texas residents sat for 9,920 GMAT • Women in Texas (32\% of scores exams.
- The mean age of Texas residents was 27.1 and the mean GMAT Total score was 513.
- Of the 24,534 GMAT score reports sent by Texas residents, 71 percent were directed to MBA programs.
sent) were slightly more likely than men in Texas (22\%) to send scores to non-MBA specialized master's programs.
- Texas residents represent 9 percent of total testing by US residents.

This report is a starting point to target your search of potential students and enhance school recruitment efforts. For example, you can purchase names of prospective students using the Graduate Management Admission Search Service ${ }^{\star}$ (GMASS®) database or develop profiles of the decision-making process for US and Canadian candidates based on data in the mba.com Prospective Students Survey Interactive Report.
See the back of this report for links to these and other resources.

## About the GMAT ${ }^{\circledR}$ Exam

The GMAT exam consists of four sections: Verbal, Quantitative, Analytical Writing, and Integrated Reasoning. GMAT "Total" scores, as presented in this report, are calculated based on performance on the Verbal and Quantitative sections of the exam. Total scores are reported in increments of 10, on a scale ranging from 200 to 800. Results are valid for a five-year period from test sitting. Please note that GMAT volume was artificially elevated in TY2O12 as many examinees opted to sit for the exam before the addition of Integrated Reasoning (IR) in June 2012.

## About GMAT ${ }^{\text { }}$ Examinees

Data in this report reflect the total number of GMAT exams that generated valid Total scores during a given testing year. Test takers who took the exam more than once during the year are included in the aggregate data. For example, an individual who took the GMAT exam twice in TY2015 would represent a total of two exams taken during that year. Program data are based on a school's current GMAT code classifications for its respective programs.

## About This Report

This Data-to-Go brief summarizes five years of data for GMAT exams taken and score reports sent worldwide, filtered by US and Canadian residence at time of GMAT registration.
Review GMAT exam and score reporting trends by:

- US Region of Residence
- US State of Residence
- Race/Ethnicity of US Citizens
- Canadian Province of Residence

Note: In late June 2014, GMAC instituted a revised policy offering test takers the ability to preview their GMAT section scores before deciding to accept or cancel the exam results. Canceled exam counts are included in this report for TY2015 data to allow for comparisons with previous years. See the Methodology section at the end of this report for more details.

Note: Dashes that appear in the table are used to indicate "not applicable", such as when there are no examinees in a given subgroup, and thus, no scores exist. For examinee privacy, dashes are also used in place of mean age and mean Total scores when there are fewer than five exams taken or less than 10 score reports sent by any given candidate group.

Note: Dashes that appear in the table are used to indicate "not applicable", such as when there are no examinees in a given subgroup, and thus, no scores exist. For examinee privacy, dashes are also used in place of mean age and mean Total scores when there are fewer than five exams taken or less than 10 score reports sent by any given candidate group.

## Methodology

## Notes About the Data

## GMAT ${ }^{\circledR}$ Volume in TY2015 and Score Preview

In late June 2014, GMAC instituted a revised policy offering test takers the ability to preview their GMAT section scores before deciding to accept or cancel the exam results. Although no score reports are distributed to schools for those who cancel their exam results, candidates do have the option to reinstate their scores at a later date if they choose.
The ability to cancel exam results is not itself new; however, candidates in the past were unable to see their section scores before making the decision to cancel a score. Following the policy change, the number of test takers choosing to cancel a score has increased from around one percent a year to more than 20 percent. Ultimately, the majority of test takers who cancel their exam results go on to retake the GMAT exam and generate a new set of reportable scores.
GMAC reports annual GMAT trends to monitor global interest and mobility in high-quality graduate management education worldwide. Because even candidates who cancel their score continue to represent recruitment opportunities for business programs around the world, GMAC will now include canceled exam volume in its candidate reports. This reporting change allows comparisons to be made more accurately across time for the number of exams taken by any given student group. Care should be taken, however, when comparing score-sending figures from TY2015 with previous years, as fewer score reports overall are now being sent as candidates have changed their score cancel behavior in line with the new policy.

## GMAT ${ }^{\circledR}$ Program Code Classifications

Program data in this report are based on a business school's current GMAT code classifications for its respective programs. In any given GMAT testing year, school representatives have the opportunity to modify their program classifications if they differ from original classifications established at the time of GMAT program code assignment. As a result, historic GMAT score-sending data may change based on such program classification changes.

## Review of Historical GMAT ${ }^{\circledR}$ Testing Data

In August 2015, GMAC conducted a review of historical GMAT testing data using new database technology. Minor anomalies were discovered and subsequently corrected for GMAT testing data between TY2007 and TY2008. Updated testing volumes for this period have dropped by approximately 1,000 exams. For details please contact David Svancer at dsvancer@gmac.com or the GMAC Research Services Department at research@gmac.com.

## Related Admissions Recruiting Resources

Looking for more students? The Graduate Management Admission Search Service (GMASS*) database can help you find the best talent to recruit for your programs. As a GMAT score recipient, you have access to the GMASS global database of prospective candidates interested in graduate management education-nearly 500,000 candidates who are waiting to hear from you.

The benefits of using the GMASS service:

- Target your audience: Use more than 30 criteria to narrow your search and tailor your message for the best response rate.
- Get the most up-to-date contacts: The global GMASS database is updated daily.
- Find the best candidates anytime, anywhere with our easy-to-use web-based application.
- Save time: Receive automatic results daily, weekly, or monthly, and save your best searches.
- Recruit early: Target GMAT pre-test candidates early in their decision-making process.
- Save money: GMASS is a cost-effective way to build multichannel marketing programs.

To get more information, or to start a GMASS subscription, please contact Paula McKay at pmckay@gmac.com, or visit gmac.com/gmass.

## Contributors

The following individuals from the Research Services Department in the School Products Division of GMAC made significant contributions to the publication of this report: Alex Chisholm, Senior Director, Research Services, manuscript review; Hillary Chan, Research Analysis Associate Manager, analysis, interpretation of data, and revising of manuscript for intellectual content; David Svancer, Research Analyst Manager, data preparation and manuscript review; Paula Bruggeman, Research Publications Manager, editorial review and publication management; Matthew Hazenbush, Research Communications Manager, manuscript review; Tacoma Williams, Research Senior Coordinator, quality assurance; Paula McKay, Director, School Products, content review; and Robert Alig, Executive Vice President, School Products, manuscript review.
